Cost Effectively, with
AIT's Global Life
Sciences Logistics
Experts**

What are life sciences logistics?

Life sciences logistics is the specialized transportation – via air, road, rail, and sea – for companies that produce pharmaceuticals, biotechnology-based medicines, medical devices, and/or biomedical technologies. These shipments may require additional services, including

customs clearance, warehouse management (cold and shelf-stable), white glove delivery, and more.

Streamline your life sciences value chain when you entrust the shipping process to AIT's professionals

AIT Worldwide Logistics takes on the unique challenges of life science businesses, managing logistics solutions to deliver life-saving medicines, transport temperature-sensitive pharmaceuticals or distribute samples for clinical trials to destinations around the world. In an industry where every moment matters, we are committed to providing fast, secure shipping services with low over, short, and damaged (OS&D) numbers.

For nearly five years, AIT has not only delivered on-time, flexible shipment options—they have also provided constant proactive service and high-quality advice.

- Head of Global Logistics, B. Braun Group, Germany's leading medical technology company

Team up with our dedicated life sciences division

AIT's Good Distribution Practices-certified control tower operates as a central hub for effective decision making throughout your shipping process—and an invaluable link in your life sciences value chain.

They're your advisors and consultants, building the perfect plan for your needs, and providing day-to-day shipment supervision and operations expertise across every aspect of your supply chain.

Count on our cutting-edge cold chain solutions

Whether you're shipping vaccines, blood, or cell and gene therapy materials, AIT's cold chain solutions are not only high-quality and regulation-compliant, they're also tailor-made to best fit your organization's needs.

Our robust life science transportation solutions include:

- Temperature reporting and smart asset monitoring (tracking humidity, falls, altitude, and more)
- Re-icing
- Phase-change materials
- Global cold chain warehousing
- Refrigerated "reefer" trucks and trailers
- Thermal blankets
- Active and passive cold chain packing

Tap into a global network of shipping solutions across a range of services, modes

When you partner with AIT, you gain access to our international network of logistics experts and resources—from white glove delivery to product repackaging to reverse logistics and much, much more.

Our global network of more than 100 locations can deliver a tailored solution that includes several beneficial options for the life sciences value chain, including:

- Chain of custody services
- Labeling and kitting
- Fulfillment services
- Asset recovery
- And more!

What are life sciences qualifications required from a logistics perspective?

AIT's life sciences logistics qualifications include:

- C-TPAT, IATA and TAPA certifications
- Registration with the Food and Drug Administration
- TSA-Certified cargo screening facilities
- Good Distribution Practices certification
